Our brand new main unit controls the operation of the luminaires in CB system. We can deliver it in two versions, according to UL or DIN standard. It works from AC and DC as well, 120-240V, attachable to any UPS, not only EML's central battery. It can handle max. 594 addressed devices, or as per DIN standard, 18x20 pcs, the joined load is max. 12 KW/ unit. With the help of its 7" display, we can set easily the device.

EML addressable emergency lighting control panel EML-601, EML-602, EML-603, EML-604, EML-605, EML-606
